Address : Dhaka, Bangladesh

Career Objective

Full stack developer skilled in React, Next.js, Node.js, Express.js, Redux, Typescript, Prisma, PostgreSQL and MongoDB. Experienced in building scalable, user-centered web applications with modern ui and collaborating in a dynamic team.

Technical Skills

Frontend: HTML, CSS, JavaScript, Tailwind CSS, React.js, Redux, Next.js, Typescript

Backend: Node.js, Express.js, RESTful APIs, Prisma

Database: MongoDB, PostgreSQL

Tools: Git, GitHub, VS Code

Deployment: Firebase Hosting, Vercel, Netlify, Render, Hostinger

Other: Firebase Auth, JWT, Socket.io, Framer Motion, Stripe Payments, Cloudinary, basic experience with external APIs

Projects

1. Medixo

Medixo is a role-based B2B e-commerce platform designed for medicine distribution, enabling admins, suppliers, customers, and delivery personnel to operate within a centralized system with full workflow control.

[Live Link](#) | [Github](#)

Role: Full Stack Developer (System Design + Implementation)

- Developed procurement system to create orders and assign suppliers
- Implemented area-based delivery using delivery codes
- Added inventory features: stock adjustment, returns, and missing tracking

Tech Stack: Next.js, Typescript, Prisma ORM, Tailwind CSS, Framer Motion, PostgreSQL, Firebase, Groq

2. Career Crafter (Team Project)

Career Crafter is an AI-powered job-seeking platform that helps you get hired faster. Build polished CVs and resumes, run mock interviews, analyze your skills, and follow a personalized learning path that closes your gaps and boosts your confidence.

Role: Both Frontend & Backend Developer, Git Manager

[Live Link](#) | [Github Client](#) | [Github Server](#)

- Create Resume and CV professionally filling required input fields
- Check ATS score of a resume and performed mock interview
- AI powered job match, Skill gap analysis and AI Coach for suggestions

Tech Stack: React, Tailwind CSS, React-Redux, Socket.io, Express, Node, MongoDB, Firebase, Groq

3. Mighty Strikers

Built a dynamic **Next.js** web application for managing a cricket team, featuring individual player dashboards, match schedules, and performance rankings. Includes an **admin panel** to control all website content and team data dynamically.

[Live Link](#) | [Github](#)

- Displays personal stats, match history, and performance analytics for each player.
- Showcases upcoming and completed matches with live data integration.
- Enables administrators to manage team rosters, match details, rankings, and website content dynamically.
- Optimized for both desktop and mobile with smooth navigation and fast load times.

Tech Stack: Next.js, JavaScript, Tailwind CSS, MongoDB, Vercel

4. Rentizo

A e-commerce car Rental Web App where cars can be booked for renting cars, post cars as a car owner and an admin dashboard to control overall website

[Live Link](#) | [Github Client](#) | [Github Server](#)

- User authentication with JWT and Firebase token verification
- Car listing, booking, and wishlist management
- Private booking dashboard with edit and cancel options
- Individual dashboards for users, car owners and admin

Tech Stack: React, Tailwind CSS, Framer Motion, Node.js, Express.js, MongoDB, Firebase, JWT

5. Medi Hurt

A Medicine E-commerce Web App where medicines are bought and sold based on the categories

[Live Link](#) | [Github Client](#) | [Github Server](#)

- Multi-provider authentication (Google, GitHub, Email/Password)
- Post, browse, and feature roommate listings
- Private booking dashboard with edit and cancel options
- Payment gateway (Stripe) and COD (Cash on Delivery)

Tech Stack: Tailwind CSS, DaisyUI, Node.js, Firebase, MongoDB, React .js, Express .js, Cloudinary, Stripe

6. Think Flow

Think Flow is a modern task management application built to help users organize work, track progress, and stay focused. It emphasizes clean architecture, strong data validation, and smooth user experience with real-time state updates.

[Live Link](#) | [Github](#)

- Secure user-based task management with full CRUD operations
- Task status and priority handling (TODO, IN_PROGRESS, DONE)
- Schema validation using Zod to ensure data integrity
- Optimistic UI updates for faster, smoother interactions

Tech Stack: Next.js, JavaScript, Redux, MongoDB, Zod, Tailwind CSS

Education

B. Sc Honours in Mathematics

Dhaka College | 2022 - Present
